Class Fee \$175

Tech Tip

Changing your needle can help with the quality of your stitching. If you hear a popping or thudding sound as the needle penetrates your needle is probably dull. You can also use a magnifier to look at the tip. A dull needle tip will appear flat and worn while a sharp one will come to a point. We recommend changing your needle after each project.

Wonder what type of needle is best for your project? Stop in and we will help guide to the right needle for you.

Quilting Corner: Roll the dice and save on all projects dropped off in January
